

LED EMERGENCY GEAR:

# LED STAR

CONSTANT CURRENT KIT

**COSINE DEVELOPMENTS**  
LEADERS IN EMERGENCY LIGHTING

## DESCRIPTION

The LED Star provides constant current to LED modules, strips or panels that requires a voltage between 10 - 150 Vdc. It has a built-in single cell lithium-ion battery to provide the emergency duration.

The light output will vary depending on the wattage of load that is used. The LED Star is small in size which makes it ideal for bulkhead emergency control gears.

## TECHNICAL DATA

<b>BATTERY TYPE</b>	3.7V Li-ion
<b>DIMENSIONS</b>	150 x 40 x 30mm
<b>EMERGENCY LIGHTING DURATION</b>	minimum 1 hour
<b>LAMP TYPE</b>	any LED between 10 - 150V
<b>MAINS VOLTAGE</b>	100 - 253Vac 50/60Hz
<b>MAXIMUM AMBIENT TEMPERATURE</b>	+45°C

## FEATURES

- > Percentage light output for 3 hours
- > Maintained or non-maintained operation
- > Built-in lithium-ion battery
- > 5 year warranty on PCB
- > 2 year warranty on battery

The unit also has a Delta version available which is compatible to most GU10 lamps or 230Vac modules.
